Mr Domenico Mansueto made a big gift to his eldest daughter Rosetta by giving her the opportunity to start up a small grocery shop located in a secondary street of Sanremo.

How many people work there?

Approximately 30 to 35 people.

What is your most memorable experience within the industry? It's hard to pick *the* most memorable experience but delivering fresh goods and drinks by refrigerated plane to M/Y *Anastasia* in Egypt is one of them.

What drew you to working in the superyacht industry? The location

and those I knew from previous jobs.

Is it a family business and what is the family's background? Yes, [we come from] a family of fishermen with so much will to improve their lives; although a fishing boat is not a yacht, our family has ploughed the waves for years!

Why do you do what you do?

Because I like my job! To use the same words Aristotle: "Pleasure in the job puts perfection in the work."

If you could change one thing about the industry, what would it be? I would not allow those without enough experience on their shoulders and/or appropriate professional qualifications to be able to open any marine business.

**PURADYN FILTERS**

These bypass oil filtration systems come highly recommended by *TCR* readers. Interestingly, the puraDYN president and CEO is *Mirabella V* owner Jo Vittoria, who has naturally fitted the filters onboard the sailing superyacht. The system "continuously filters lubricating oil by reducing solid contaminants to less than one micron, as well as removing liquid contaminants, therefore maintaining the oil's viscosity and safely and dramatically extending oil drain intervals", says the website.
