TEAK CLEANER STEP 1

TEAK MINUS is a quality controlled biodegradable, phosphate free chemical, with no acid in the formula. It was developed specifically for use in the marine industry. TEAK MINUS is concentrated to emulsify/breakdown the dirt, grease, oils and other pollutants that accumulate in teak wood.

Heavy clean (1) part TEAK MINUS to (3) parts water.

For lightly soiled teak, dilute (1) part TEAK MINUS with (10) parts water, or use our general cleaner, LESTRAIN(1) part to (3-5) parts water, and follow with TEAK PLUS.

DON'T GET THIS PRODUCT ON ANODIZED ALUMINIUM - IT WILL ETCH IT!

When using TEAK MINUS, scrubbing with a "doodle bug", or a soft brush will be ample for application. Each user can use his own experience as to desired dilution after becoming familiar with use of these products.

NOTE

TEAK MINUS is not to be rinsed from teak until TEAK PLUS, the companion neutralizer, is applied after scrubbing.

CAUTION

If you get TEAK MINUS on the skin, always have vinegar present, or have a pail of 2% solution in water to quickly neutralize it, and rinse completely with plenty of water. If you get it in your eyes, rinse for 15 minutes with water and call a physician. It is suggested that goggles and gloves be worn when using these products for safety. Keep all chemicals out of reach of children and animals.

TEAK BRIGHTENER STEP 2

TEAK PLUS is a quality controlled, biodegradable chemical product formulated for use in the marine industry. It restores the bright, natural luster to teak wood surface and trim.

TEAK PLUS is applied after the teak wood has been cleansed with its companion product, TEAK MINUS. Use a soft brush or “doodle bug” pad to apply. Apply TEAK PLUS, lightly scrubbing prior to rinsing.

NOTE

Do not rinse before applying TEAK PLUS to the TEAK MINUS after MINUS has done its work. Then rinse completely.

Always use TEAK PLUS as it comes from the bottle for best results. It is always wise to establish your own ratio for cleaning teak. (Never clean more than 5 square feet at any one time). Always clean around varnished areas. Use plenty of water on these areas while working with both MINUS and PLUS.

CAUTION

While TEAK PLUS will not harm good paint or stain fiberglass, it contains acid, and it is advisable to wear gloves completely with water or keep a small amount of baking soda in a pail of water (it will neutralize quickly). Do not get this product in your eyes. If you do, rinse eyes for 15 minutes and call a physician.
