

CUSTOM FENDER HOOKS

Enduring Protection– MegaFend custom fender hooks are the perfect way to protect a yacht’s varnished, painted, or stainless hand rails. They also help assure that suspended fender lines remain clear of yacht surfaces, a further safeguard against unwanted surface or line abrasion.

Handcrafted Quality– The core structure of each fender hook is available in quality 316 stainless steel or aluminum where applicable. The finest sheep’s wool covers the core, protecting rail surface area. The outside is covered with premium-grade, maintenance-free heavyweight leather. All Megafend fender hooks are handcrafted and designed for heavy use. A wide selection of standard and specially crafted hardware including Patent Pending Megafend pad eyes, spreader bar, line holder, rod mount and fender hook designs are available. Megafend will custom configure hooks to your exact specifications.

Fender hooks shown are typical configurations. Shape & hardware can be configured to your exact needs. The outer covering of premium-grade leather is available in your choice of maintenance-free natural, black, white and now, red, blue or green colors.

Removable Megafend chafe gear is designed for heavy use applications. All of our chafe gear can be installed or removed on your lines without the need to re-braid the line end. We construct each style with only the finest materials and make them to fit any size line, and to your desired length.

Megafend fluffy chafe gear– Our sheep's wool fluffy, available in white or black, is used where the fender line or dock line rubs against paint or gelcoat. They are available in sizes to match the line diameters readily used as well as in whatever length is needed. Caution– black fluffy is ONLY to be used ON BLACK LINES or color bleed may occur.

Our fluffy chafe gear is available in white or black

Megafend ballistic nylon or leather chafe gear wraps– Each is used to provide protection for dockline hawsers, line eyes or where dock lines come in contact with rubrails. They are designed for heavy use and available in sizes to match the line diameters readily used as well as in whatever length is needed. Our ballistic black chafe gear is a premium look with excellent wearability. Our silver crust cowhide chafe is a unique look with excellent style and wearability. Our black leather chafe is a traditional look with excellent style and wearability.

SOLID CORE FENDERS

MM MGF MEGA 100+	size 559mm (22") dia. x 1194mm (47") length
MM MGF MEGA 90	size 457mm (18") dia. x 1016mm (40") length
MM MGF MEGA 80	size 356mm (14") dia. x 889mm (35") length
MM MGF MEGA 70	size 305mm (12") dia. x 889mm (35") length
MM MGF MEGA 50	size 254mm (10") dia. x 660mm (26") length
MM MGF MEGA 30	size 152mm (06") dia. x 508mm (20") length

Solid-Core Durability– Megafend solid core fenders are available in all the standard marine sizes and are performance engineered to withstand heavy use. Each has an outer covering of quality Sunbrella® marine fabric with black being the standard color. All standard models use a 25mm (1") pvc pipe through the center. An optional stainless steel rod kit is available for conditions where extreme service is the rule. Our stainless kit is equipped with a ring over each end. Specialty sizes and over 100 colors are available on request. We'll also recover your existing fenders, even if made by others, when needed.

Megafend has many additional hardware items for installation on its Fender Hooks. Several of these items are so innovative as to be Patent Pending. For ordering or further information please call: +39 3396709546.

MEGAFEND 100% PURE NEATSFOOT OIL

MM MGF NEATSFOOT OIL 32 FL. OZ

Megafend 100% Pure Neatsfoot Oil Marine Grade is one of the finest preservatives available. As the name indicates, it is a 100-percent pure, all-natural product, free of any petroleum or other compounds. It is time proven excellent protection for all standard finish leather articles subjected to outdoor use. It is absorbed deep into leather fibers, keeping them soft, pliable, repelling moisture and lubricating against the drying effects of weather. Recommended for care and restoration of marine leathers such as standard finish fender hooks, leather upholstery and most other marine leather appointments. Oil may tend to darken light colored leathers. Do not use on suede or nubuck leathers.

WARNING: DO NOT USE ON LEATHER SURFACES DESIGNATED AS MAINTENANCE-FREE. Permanent damage to the finish will occur.
